PROJECTS

Loftly – Fediverse Social Media Manager

- Implemented OAuth login flows for Mastodon, Bluesky, Pixelfed, and Lemmy, enabling secure and reliable authentication.
- Engineered a FastAPI backend for handling user actions and Supabase integrations for tracking and analytics.
- Developed and deployed responsive Vue/Quasar front-end components with a focus on clean UI and smooth UX.

ChalkBag – Cross Platform Media Application

- Designed and built a cross-platform mobile app in .NET MAUI with relational database integration and authentication, ensuring accurate data handling across devices.
- Integrated Supabase for user posts, authentication, and data storage.
- Enabled climbers to track and share achievements across devices.

SKILLS

C# / C++ ●●●●● Relational Databases ●●●●● Object-Oriented Programming ●●●●●

- Languages: C#, C++, Python, TypeScript, Java, Bash
- Databases: PostgreSQL, Supabase, SQLite
- Tools: Git, Linux, Windows, Agile, Test Automation

EDUCATION

University of Missouri - Kansas City

Computer Science BS

12/2027

- Micro-credential: U.S. Department of Education Center of Excellence: AI- Empowered Spatial Computing

Johnson County Community College

Associates of Information Science - 3.7 GPA

05/2024

- Phi Theta Kappa

WORK EXPERIENCE

Hy-Vee

General Merchandise Clerk

05/2021 - Present

- Applied problem-solving and system organization to maintain inventory accuracy across multiple departments, consistently meeting time targets.
- Provided customer service by answering questions and making informed product suggestions.
